

# OAK SHIELD SOLUTIONS LLC

CYBERSECURITY | SECURE INFRASTRUCTURE | IT PROGRAM SUPPORT

SECURE | EXECUTE

SBA-CERTIFIED SDVOSB & VOSB • FEDERAL / STATE / PRIME TEAMING

Oak Shield helps public-sector teams close RMF and audit gaps, remediate infrastructure risk, and execute secure IT transitions with CISSP/PMP-led key personnel experienced in classified DoD environments.

## CORE COMPETENCIES

|                                 |                                                                                                                                                                                                                                                                                                                                                      |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RMF / ATO READINESS             | <ul style="list-style-type: none"><li>• Security-control and artifact gap reviews; POA&amp;M cleanup and remediation tracking</li><li>• DISA STIG implementation, validation, vulnerability remediation, and audit readiness</li><li>• NIST SP 800-53 / 800-171 compliance support and continuous-monitoring documentation</li></ul>                 |
| SECURE INFRASTRUCTURE           | <ul style="list-style-type: none"><li>• Windows Server, Active Directory, Group Policy, VMware, SCCM/MECM, and Microsoft 365</li><li>• Secure configuration, patch management, endpoint administration, and backlog reduction</li><li>• Operational stabilization, change control, documentation, and transition support</li></ul>                   |
| CYBER PROGRAM & PROJECT SUPPORT | <ul style="list-style-type: none"><li>• Cyber governance, risk/status reporting, metrics, and executive-level technical communication</li><li>• IT project planning, service-management processes, SOPs, and implementation coordination</li><li>• Incident-response support, technical analysis, and cross-functional delivery management</li></ul> |

## RELEVANT KEY-PERSONNEL EXPERIENCE

- Supports enterprise Department of Defense information systems in classified environments.
- Led vulnerability remediation, security hardening, patching, STIG implementation, and corrective-action tracking.
- Administered Windows Server, Active Directory, VMware, enterprise endpoint tools, and secure configuration baselines.
- Produced technical documentation, assessed operational risk, supported incident response, and briefed leadership.

*Prior employer and military experience; not represented as Oak Shield corporate past performance.*

## COMPANY SNAPSHOT

|                |                                           |
|----------------|-------------------------------------------|
| UEI            | VNMJGXH8NBU7                              |
| CAGE           | 21QG4                                     |
| STATUS         | SAM Active   All Awards                   |
| CERTIFICATIONS | SBA-Certified SDVOSB & VOSB               |
| STRUCTURE      | California Limited Liability Company      |
| LOCATION       | Roseville, California                     |
| SERVICE AREA   | Nationwide   Remote   On-site as required |

## DIFFERENTIATORS

- CISSP, PMP, and Security+ certified leadership
- Key personnel holds active TS/SCI eligibility with CI Polygraph
- DoD classified-environment systems and cybersecurity experience
- Former U.S. Army HUMINT professional with special-operations-support experience
- Direct owner involvement and rapid senior-level response

## CODES

|           |                           |
|-----------|---------------------------|
| NAICS     | 541512 (Primary)   541519 |
| LEAD PSCs | DJ01   DF01   DD01        |
